

Data Assurance Consultant

PwC Risk Assurance practice entails a holistic approach to risk that protects businesses, facilitates strategic decision making and enhances process efficiency. Our approach is complimented by subject matter expertise per industry (e.g. Financial Services, Communications, Shipping etc.) and per Risk area (e.g. Systems, Data, Business Process Cycles etc.).

Our Data Assurance professionals specialize in assisting our clients to establish Data Confidence by providing value-added assurance over the integrity of reporting, calculations, reconciliations and other data-related processes and risks. We provide services such as validation of reports, interfaces and algorithms, data migration assurance and data quality assessments.

The role entails:

As a Data Assurance consultant, you will be working in client facing engagements and have the opportunity to:

- Evaluate business operations through analysis of process data and transactions
- Work closely with external financial audit teams to ensure completeness and accuracy of data used in the financial audits
- Design complex data models to support advisory assignments (i.e. data migrations, data quality etc)
- Develop subject matter expertise in industry specific operations & systems (i.e. Banking)

Desired Skills and Experience

- Excellent academic background from a Greek or foreign top-tier university with background in Business administration, mathematics, statistics, engineering or related discipline.
- Ability to work with standard database query (e.g. SQL), data manipulation tools or related programming languages.
- Ability to interpret business requirements as well as re-model processes or calculations.
- Military services completed for male candidates.

Any of the following will be considered an asset:

- Working experience 0 -2 years in in data related engagements such as data modelling, process mining, data visualization, or data quality
- Experience with tools such as ACL, SAS, Python, Qlikview, Tableau or similar
